SUMMARY

Cybersecurity-focused Computer Science student with hands-on experience in ethical hacking, network security, and secure application development. Possessing strong foundational knowledge in Computer Networks, Network Security, Operating Systems, Web Technology, and Computer Organization. Proficient in Python and security tools including Nmap, Wireshark, Burp Suite, and Nessus. Experienced in building security-focused projects and performing vulnerability assessments. Seeking an entry-level cybersecurity role to apply and enhance practical security skills.

PROJECTS

Network Scanner & Vulnerability Reporter

Developed a Python-based network scanning tool integrated with Nmap to identify open ports, running services, and potential vulnerabilities.

- Performed port scanning and service enumeration using Nmap
- Mapped common vulnerabilities based on open ports
- Generated automated scan reports in CSV format
- Strengthened practical knowledge of network security and reconnaissance

Tech Stack: Python, Nmap, Networking

Steganography using LSB Technique

Developed a Flask-based security application to hide confidential data in images and audio files using the Least Significant Bit (LSB) technique.

- Implemented secure encoding and decoding using Python and Pillow
- Ensured data confidentiality through invisible data embedding
- Strengthened understanding of cryptography and secure communication

Tech Stack: Python, Flask, Pillow

Online Examination Control System

Developed a role-based web application for secure online examinations.

- Designed Admin, Teacher, and Student modules
- Implemented session management and access control mechanisms
- Automated result generation and data handling

Tech Stack: Python, Streamlit

Local Service Finder Portal

Built a database-driven web platform to connect users with local service providers.

- Designed backend logic for efficient data storage and retrieval
- Integrated MySQL database for dynamic functionality

Tech Stack: Python, Streamlit, MySQL

INTERNSHIP/TRAINING

Cybersecurity & Ethical Hacking Training — C-DAC Patna (2nd June 2025 – 30th June 2025)

- Performed vulnerability assessments using Burp Suite and Nessus
- Conducted network traffic analysis using Wireshark
- Used Nmap for network scanning and service enumeration
- Worked in Kali Linux environment for penetration testing tasks
- Applied OWASP Top 10 to identify web application vulnerabilities

IoT Internship — Scortek India Pvt. Ltd. (1st Oct 2024 – 16th Oct 2024)

- Developed Arduino-based smart systems using sensors and actuators
- Gained hands-on experience in embedded programming (C/C++) and circuit design

EDUCATION

Diploma in (CSE) | Government Polytechnic West Champaran (2023-2026) | **CGPA:** 8.5
Xth from (BSEB Patna) | UHS – Chainpur Masuria, (2023) | **Percentage:** 75.04%

TECHNICAL SKILLS

Programming: Python, PHP, C (Basic)

Cybersecurity Tools: Nmap, Wireshark, Burp Suite, Nessus, Metasploit

Operating Systems: Kali Linux, Ubuntu, Windows, VMware

Networking: TCP/IP, DNS, HTTP/HTTPS, Network Scanning, Packet Analysis

Linux Skills: File Permissions, Process Management, Bash

Web & Database: HTML, CSS (Basic), MySQL

Core Concepts: OWASP Top 10, Vulnerability Assessment, Network Security, DBMS, OOP

SOFT SKILLS

Communication • Problem Solving • Teamwork • Time Management

CERTIFICATIONS

- Ethical Hacker (EH) — Cisco Networking Academy
- Cybersecurity Essentials — Cisco Networking Academy
- Python Essentials 1 & 2 — Cisco Networking Academy
- Certified Threat Intelligence & Governance Analyst — Red Team Leaders
- Foundation of Log Analysis for Cyber Defense — Red Team Leaders
